MediRoute - Blood Bank Demo Inventory

Synthetic test data only. Use Blood bank > Add blood data > choose this PDF > Read PDF and analyse. Target units are needed to calculate exact gaps. Add batch and handling details for safe transfer proposals; locality and coordinates enable routes.

This file covers matched surplus and shortage, exact transfer quantities, donor reserve protection, mismatched product/type, expired and unreleased batches, missing storage/transport checks, stock-only and unknown counts, and a transfer with missing map coordinates.

Facility	Blood group	Component	Target units	Available units	Batch reference	Expiry	Released	Storage verified	Transport verified	Locality	Latitude	Longitude
Central Blood Bank	A+	Red cells	10	6	CBB-A-RBC-01	2026-11-10	Yes	Yes	Yes	Connaught Place	28.6315	77.2167
